Analgesy-Meter
Randall-Selitto Paw Pressure Test
Cat. No. 37215

General
The 37215 is the up to date version of the classical 7200 paw pressure test which, since 1965, is helping to perform a rapid precise screening of analgesic drugs in a number of academic and industrial laboratories.

We are now introducing a specific pressure sensor and the related controller, available as optional, to transform the Analgesy-Meter in a fully digital device.

As the basic design is unchanged, results with the digital model are consistent with published data. The upgrade kit has been designed to be fitted on existing Ugo Basile Analgesy-Meters as well. Ask for details!

Main Features

- Same instrument, three force ranges (from 0 to 250, 500, 750 g)
- Simple and reliable: no calibration needed!
- NEW model with digital reading
- Specific version for Mouse available, with lower (50% pressure range)
- Classic method since the 1960s: hundreds of papers published!
- Upgrade kit for old Analgesy-Meters available

Ugo Basile: more than 25,000 citations
Instrument Description

The force is applied to the animal’s paw, which is placed on a small plinth under a cone-shaped pusher with a rounded tip. The operator depresses a pedal switch to start the mechanism which exerts the force: the force increases at a constant rate, thus enabling perfect reproducible measurements to be made. The motor stops immediately the pedal is released.

Force is measured on the scale calibrated in 10g steps. The scale can be multiplied by 2 or 3, by placing on the slide one or two discs provided with as standard.

After each test the slide is returned to its starting point by lifting it and pushing it to the left. The 37215 features a low voltage synchronous motor and conforms the CE rules.

The standard 37215 can be conveniently used with mice. However, a dedicated model is also available, when lower pressure (50%) is desirable, model 37216, which includes a special chisel-shaped pusher (also available separately)

Data Acquisition

The classic Analgesy-Meter can now be integrated with a specific pressure sensor and the related controller, available as optional, which upgrades the Analgesy-Meter to a fully digital device.

As the basic design is unchanged, results with the digital model are consistent with published data.

The design of the upgrade kit makes it easy to retrofit existing UB Analgesy-Meters as well.

37215 Specifications

Power Requirements: 115 or 230V, 50/60Hz, 15W max.
Start / Stop : by pedal switch
Force Range 37215 : 0 to 250, 500, 750 grams
37216 : 0 to 125, 250, 375 grams

Physical:
Dimensions : cm 40 x 16 x 14
Packing : cm 55 x 45 x 36
Weight : 2.1Kg
Shipping Weight : 5.0Kg approx

Ordering Information

37215 ANALGESY-METER, complete with following standard accessories:-
37215-302 Instruction Manual (on USB key)
37215-303 Pedal Switch, complete with cable
37215-323 Set of discs for additional weight
37215-321 Plinth
37215-322 Standard Pusher *
E-WP008 Mains Cord
* Pushers in special material/shapes, available on request

37216 ANALGESY-METER, low-pressure model, suitable for mice, with pusher 37215-326

Optional Upgrade to Digital

37215-100 ANALGESY DAQ upgrade kit
37215-BUNDLE Analgesy-Meter & Upgrade Kit
